Team Updates

I. What did you do since the last meeting?

I. Rabeya designed the database schema for user registration and authentication, including tables for users, sessions, and email verification tokens.

II. Sunehra developed UI wireframes for registration and login pages, focusing on responsive design for desktop and mobile.

III. Nasrat set up the initial admin panel framework, including role-based access control and dashboard layout.

IV. Oishy created the testing plan for Sprint 1 and drafted initial documentation for registration and login workflows.

V. Ameer facilitated Sprint 1 planning, reviewed backlog items, and ensured alignment between frontend and backend tasks.

II. What obstacles are you encountering?

Backend and frontend integration is not yet complete.

Email verification API access is pending from the external service provider.

Lack of test data for early user authentication trials.

III. What do you plan to accomplish by the next meeting?

I. Rabeya will integrate the registration module with the database and ensure data validation.

II. Sunehra will implement registration form validation and connect frontend to backend endpoints.

III. Nasrat will develop admin panel navigation and prepare for content management module integration.

IV. Oishy will update documentation and track API integration progress.

V. Ameer will monitor sprint progress, unblock pending email verification API issues, and maintain Scrum adherence.
