Team Updates

I. What did you do since the last meeting?

- I. Rabeya completed the backend registration module and initial session management logic; started implementing login validation.
- II. Sunehra integrated the login page with backend authentication endpoints and performed initial frontend testing for validation errors.
- III. Nasrat completed admin dashboard navigation and basic UI functionality; tested role-based access.
- IV. Oishy logged discovered bugs in user authentication flow and updated documentation with backend endpoint details.
- V. Ameer ensured team coordination and monitored completion of highpriority backlog tasks.

II. What obstacles are you encountering?

Persistent login (auto-login) is not functioning correctly on mobile browsers. Some content module images are failing to render due to broken file paths.

Minor conflicts in database session handling during concurrent logins.

III. What do you plan to accomplish by the next meeting?

- I. Rabeya and Sunehra will fix login/registration bugs and implement persistent login functionality.
- II. Nasrat will begin developing the content display module to show multimedia articles.
- III. Oishy will update test cases for the registration/login module and begin QA for persistent sessions.
- IV. Ameer will ensure backlog items are updated in Jira, prioritize unresolved tasks, and unblock API issues.
